

# WINTERSTEIGER

Thinking about tomorrow.

## Storage & Racking

The best boot dryers available, developed over many years by Ski2 and Wintersteiger.

The range starts with the Innova 5 and Innova 15 pair dryers and works all the way up to the Premia Pro 84 pair dryer.

With built-in heating, timers and disinfection these are the solution to the problem of wet and smelly boots

The ski & snowboard racks come in sizes from 0.5m to 2.5m and can store a variety of skis, boards, poles and helmets (depending on model and configuration chosen) They can be free-standing, on free rolling wheels or on a rail system to maximise the usage of space.

The boot and helmet racking is built to complement both the ski & board racks and the Premia range of boot dryers.
